

Chief Executive Officer.

Industrial Engineer from the University of Comillas (ICAI) and she completed the General Management Programme at the University of Navarre Institute of Higher Business Studies Business School (IESE Business School).

EXPERIENCE RELEVANT TO HER DUTIES AT IBERDROLA

Energy sector and industrial engineering

She began her professional career occupying different positions in the Felguera Group, and in 1996 she joined Iberdrola Engineering and Construction as head of the Tagus Basin on the META (Improvement of the Operation, Adaptation to Remote Control, and Automation) Project.

She has a long history within the Iberdrola Group. She joined Iberdrola Renewables in 2001 as Operations Director, managing the operations and maintenance team, where she gained intense technical experience and valuable practical knowledge of the renewables business. She was made Director of Exploration and Technology in January 2007, where she was the global head of regulatory affairs and R&D&i and a member of Iberdrola Renewables' senior management team. She has been, from July 2015, the Iberia and International Director at Iberdrola Renovables Energía, S.A.U. and a board member of Iberdrola Renovables Energía, S.A.U. and Iberdrola Renovables México, S.A., as well as other group companies.

She is also a member of the International Energy Agency's Renewables Industry Advisory Board.

She has been Vice President of the Wind Power Business Association and member of the EWEA Board.
